

covariance layer: broad formal support, thin usable aperture

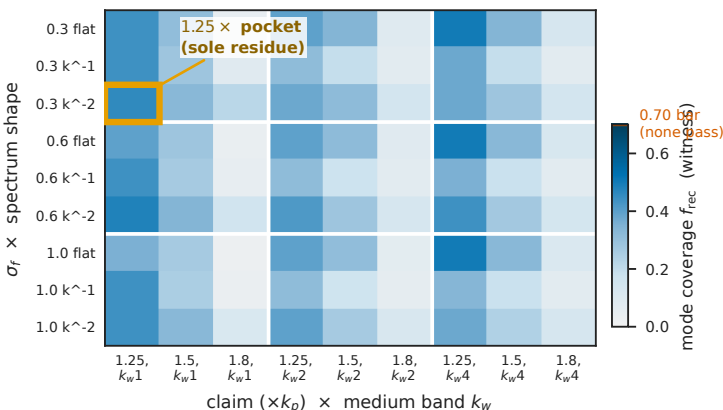

(a) spectral law: covariance crosses the mean wall

(b) the aperture is real (64×64)

(c) 81-cell Fisher atlas: REGION_EMPTY, 0/81 pass

(d) pocket branch

BRANCH = PENDING

blind demo verdict arrives separately. A = achieved (filled); B = unrealized (hollow). Both variants prepared.

pocket: $f_{\text{rec}}(\text{nat}) 0.79 \cdot \text{NRMSE } 0.10 \cdot T_{\text{req}} \approx 197$
